## **ABSTRACT**

The present invention relates to a medicament for preventing and / or treating HIV infectious diseases comprising a compound of formula (J) as active ingredient and glucopyranose derivative of formula (W) or non-toxic salts thereof (the symbols in the formula are as described in the specification).

A glucopyranose derivative of formulae (J) or (W) or a non-toxic salt thereof is useful as a medicament for preventing and / or treating HIV infectious diseases (AIDS).
